

CARBURETOR GASKETS

We have changed our gaskets to a black nylon material to help prevent leakage. The original red fiber material is made from layers of paper. Over time the gasket may soften and allow some leaking of gas past the gasket. We have included extra red gaskets for customers who would like to rebuild their carburetor with the original looking gaskets on the outside for the drain plug and the gas strainer. **DO NOT** over tighten the nylon gaskets as you can squeeze gasket out from under part.
